

Module 1: Product Design Mindset

Vibe Designing - UI/UX Masterclass - Lesson 1

Vibe Designing - UX Foundations.

Start by understanding what UI and UX mean, how users move through products, and how designers solve real problems before making screens. In this lesson, you will learn product design mindset through a practical school-style project. Focus on the core concept, build a small deliverable, review your decisions, and save evidence of your work for your portfolio.

Production practice: write down the goal, the target user or client, the tool settings you used, and what you would improve in the next version. By the end of this lesson you should have a concrete checkpoint that can be reviewed by a tutor or included in your graduation project.
